

Gem Rural Fire Association

Gem, Alberta, Canada.

In August, 2005, we purchased from Just- In Case Fire Ltd, Calgary, AB. two Fire Caddy's with 250 Gallon trailers, extra layflat hose and large volume nozzles.

The Fire Caddy's come complete with "FlameOut", the biodegradable fire foam suppressant, which we had not tested and were unsure of its total capabilities.

We have had two prairie fires with strong winds, which moved the fires rapidly and dangerously. This gave us the opportunity to see first hand the ability of FlameOut to curtail the danger of the fire spreading.

Our volunteer fire fighters sprayed the grass where the fire was headed and were amazed that once the flames reached the foamed area, the fire extinguished itself immediately.

We were all very impressed.
