

FIRE CADDY DC™

FIRE CADDY DC1205

is *the* 12 volt self-contained fire foam suppression system. This patent pending, high-power, economical system has been engineered specifically for the high demands of fire fighting.

FIRE CADDY DC1205 - 12 volts that charge at fires

- Rechargeable battery
- 25 feet ¾" lay-flat hose
- adjustable brass shut-off nozzle
- AC/DC wall charger
- in-line strainer
- 5 gallons of FlameOut

Fire Caddy DC™ delivers 6.0 gpm at 110 psi, with a maximum pressure of 175 psi and a maximum flowrate of 8.2 gpm, giving the operator optimum control.

The portable system works on all Class A and Class B fires. It is *ideal for use on* temporary work sites, emergency response vehicles, service vehicles, tow trucks, transport trucks, or anywhere that emergency first response fire performance is required.

Fire Caddy DC™ uses an environmentally safe, non-toxic, 100% biodegradable foam called FlameOut® which is the most effective Class A/B combination fire fighting foam available on the market today.

Just-In Case Fire Ltd., offering innovative fire suppression solutions ...

...*“between the Fire Extinguisher and the Fire Truck”*.
